PROBLEM STATEMENT

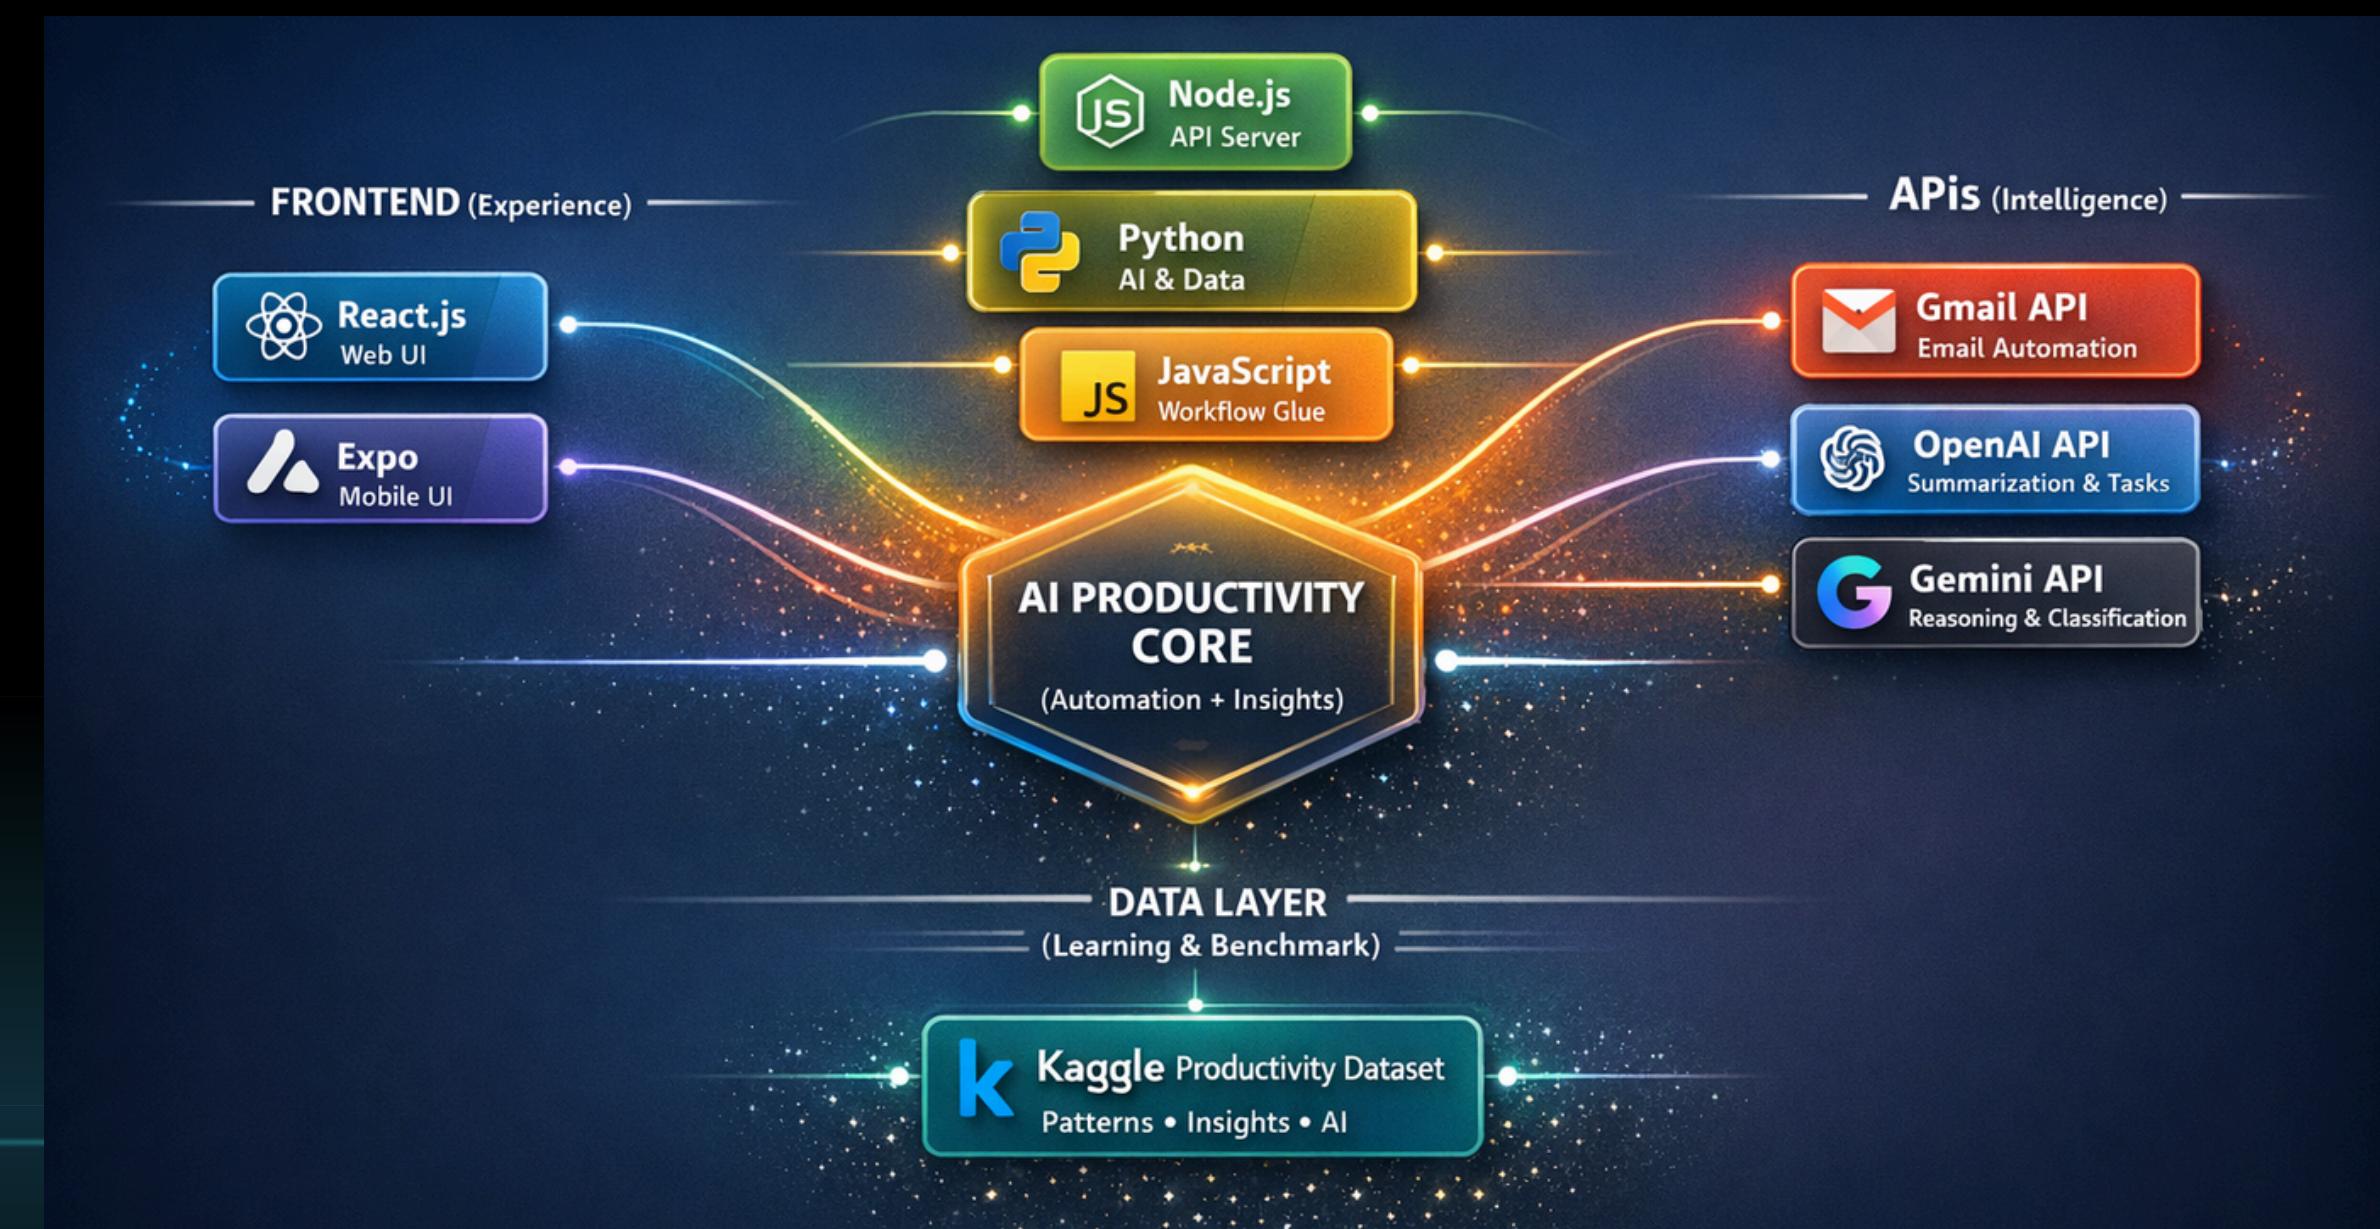

“In today’s world, professionals and students juggle multiple tools like calendars, emails, to-do apps, and reminders.

Managing reminders, follow-ups, prioritization, and scheduling across platforms is manual, error-prone, and time-consuming.

KEY FEATURES

1. Chronos Personal AI Assistant
2. Task Manager
3. Calendar Intelligence
4. Email Automation
5. Meeting Intelligence

TECH STACK

Chronos AI Assistant

- - 1.Voice and text-based interaction
 - 2.Natural language task & meeting scheduling
 - 3.Voice response using speech synthesis
 - 4.Cross-module orchestration (tasks, calendar, email)
-

TASK MANAGER

- 1.* add or remove tasks
2. Full CRUD operations
- 3.* Task completion tracking
- 4.* Focus Mode with timer
- 5.* Smart reminders (1 hour before deadline)
- 6.* AI-based task prioritization which prevents cognitive drain

CALENDAR INTELLIGENCE

Meeting scheduling and rescheduling
smart Remainder before 5 mins
Conflict detection
Workload analysis
Smart alternative time suggestions with reasoning

EMAIL AUTOMATION

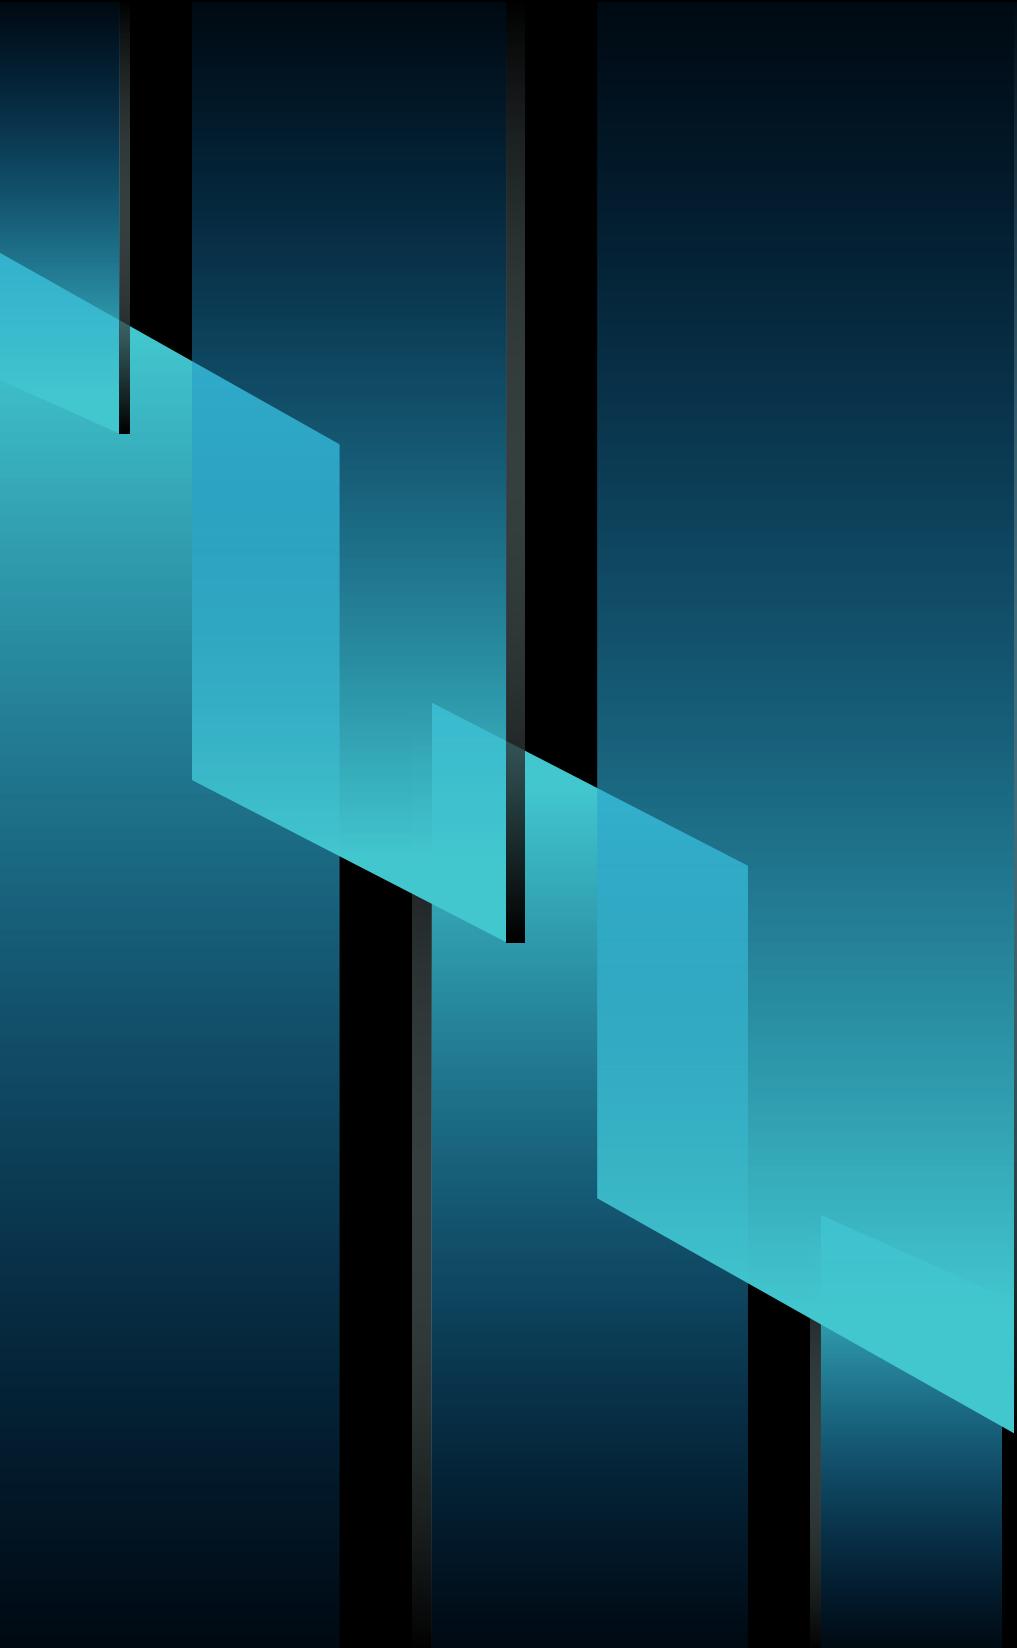

- * Spam detection using keyword intelligence
- * Email prioritization (client, finance, deadlines)
- * Automated drafting (leave applications, recruitment)
- * Gmail API integration

MEETINGS INTELLIGENCE

- * Minutes of Meeting (MoM) editor
- * Meeting summaries
- * Transcription support (future-ready)
- * Key insight extraction

SCALABILITY & FUTURE SCOPE

- * LLM-powered email generation
- * Whisper-based meeting transcription
- * Mobile app support
- * Smart habit tracking
- * Predictive burnout detection

THANK YOU
